NUMERICAL HEAT TRANSFER

An International Journal of Computation and Methodology

PART B: FUNDAMENTALS

CONTENTS Vol. 58 No. 1 2010

1 Improvements in FFD Modeling by Using Different Numerical Schemes **Wangda Zuo, Jianjun Hu, and Qingyan Chen**

17 A Simple and Accurate Ghost Cell Method for the Computation of Incompressible Flows Over Immersed Bodies with Heat Transfer **Dartzi Pan**

40 The Assessment of Multispectral Radiation Thermometry Using Linear and Log-Linear Emissivity Models for Steel **Chang-Da Wen and Yi-Hau Chr**

55 Lattice Boltzmann Simulation of Incompressible Transport Phenomena in Macroscopic Solidification Processes **Dipankar Chatterjee**

CONTENTS Vol. 58 No. 2 2010

73 High Rayleigh Number Laminar-Free Convection in Cavities: New Benchmark Solutions **F. Arpino, N. Massarotti, and A. Mauro**

98 Comparison of Different URANS Schemes for the Simulation of Complex Swirling Flows **Juan A. Ramírez and Cristóbal Cortés**

121 Treatment of Checkerboard Pressure in the Collocated Unstructured Finite-Volume Scheme **M. Moradi Larmaei, J. Behzadi, and Tew-Fik Mahdi**

CONTENTS Vol. 58 No. 3 2010

145 Development of a Compact and Accurate Discretization for Incompressible Navier-Stokes Equations Based on an Equation-Solving Solution Gradient, Part I: Kernel Scheme Fundamentals **Yao-Hsin Hwang**

170 Development of a Compact and Accurate Discretization for Incompressible Navier-Stokes Equations Based on an Equation-Solving Solution Gradient, Part II: Formulation on Unstructured Polygonal Grids **Yao-Hsin Hwang**

193 Development of a Compact and Accurate Discretization for Incompressible Navier-Stokes Equations Based on an Equation-Solving Solution Gradient, Part III: Fluid Flow Simulations on Staggered Polygonal Grids **Yao-Hsin Hwang**

CONTENTS

Vol. 58 No. 4 2010

217 An Unstructured Finite-Volume Method for Incompressible Flows with Complex Immersed Boundaries **Lin Sun, Sanjay R. Mathur, and Jayathi Y. Murthy**

242 A Simple Finite-Volume Formulation of the Lattice Boltzmann Method for Laminar and Turbulent Flows **Seok-Ki Choi and Ching-Long Lin**

262 Development of an Incompressible Navier-Stokes Solver Involving Symplectic and Nonsymplectic Time Integrators **Tony W. H. Sheu and C. H. Yu**

CONTENTS

Vol. 58 No. 5 2010

287 Investigation of Heat and Mass Transfer in a Lid-Driven Cavity Under Nonequilibrium Flow Conditions **Benzi John, Xiao-Jun Gu, and David R. Emerson**

304 Level Set–Based Topological Shape Optimization of Heat Conduction Problems Considering Design-Dependent Convection Boundary **Seung-Ho Ahn and Seonho Cho**

323 Numerical Analysis of Bubble Growth and Departure from a Microcavity **Woorim Lee, Gihun Son, and Jae Jun Jeong**

343 An Improved Bubble Packing Method for Unstructured Grid Generation with Application to Computational Fluid Dynamics **Lilong Wu, Bin Chen, and Gaoling Zhou**

CONTENTS

Vol. 58 No. 6 2010

371 Multiphysics Model of Metal Solidification on the Continuum Level **Seid Koric, Lance C. Hibbeler, Rui Liu, and Brian G. Thomas**

393 Numerical Modeling of Alternate Melting and Solidification **Shimin Wang, Amir Faghri, and Theodore L. Bergman**

419 Thermal and Stress Analysis of Glazing in Fires and Glass Fracture Modeling with a Probabilistic Approach **S. Dembele, R. A. F. Rosario, Q. S. Wang, P. D. Warren, and J. X. Wen**

440 Development of a Compact and Accurate Discretization for Incompressible Navier-Stokes Equations Based on an Equation-Solving Solution Gradient: Gradient Limiters for High-Reynolds-Number Flows **Yao-Hsin Hwang**
